Brother MFC 7840W - Features That Support You Reduce Cost

The [Brother MFC 7840W](#) Laser Multi-Function Center with Wireless Networking is an economical, compact device that can handle all your small office printing, copying, scanning, and faxing needs.

With crisp, high-quality output and fast print speeds, you surely won't be waiting around for the Brother MFC 7840W to finish its job. Brother MFC 7840W is compatible with both Macs and Windows, and built-in 802.11b/g wireless networking makes it easy for you and your team to share the device with everyone in your office.

The Brother MFC 7840W is a compact and affordable, wireless-ready laser Multi-Function Center that is best use for any desktop or small office. Brother MFC 7840W combines crisp, high-quality laser printing, copying, color scanning and faxing into a single, space saving device while delivering impressive print and copy speeds of up to 23 pages per minute. Brother MFC 7840W additional features include a 33.6K bps high speed fax modem, a 35-page automatic document feeder, adjustable 250-sheet paper tray and a single-sheet by-pass tray. For maximum flexibility and connectivity, the Brother MFC 7840W also includes built-in Wireless and Ethernet network interfaces as well as a USB interface.

Brother 7840W gives crisp black output at 2400 x 600 dpi, no one will be straining their eyes to read your latest report. And with the prints coming out at a speedy 23 pages per minute, you won't have to wait for them either. The printer includes 32MB of memory and has a maximum monthly duty cycle of 10,000 pages. Thanks to support for PCL 6 and BR-Script3 print emulations, the printer will work seamlessly with a large variety of computers.

The [MFC 7840w](#) features a 250-sheet paper tray that can be adjusted for both letter and legal size paper. Other media, such as envelopes and labels can be fed through the single-sheet bypass slot. The fold-out rear output tray reduces the possibility of paper jams by allowing for a straight paper path when printing envelopes and other thick media.

Using the same components that does the printing, you can make copies at the same fast 23 pages per minute. Thanks to a 35-page auto document feeder, you can copy, fax, and scan multiple pages without standing around manually swapping pages. The copier lets you reduce and enlarge from 25 to 400 percent of the original, and you can put 2 or 4 sheets on one page. The copier also supports a sorting function.

[Brother MFC7840W](#) with built-in 33.6k bps fax modem lets you fax documents at speeds of up to 2 seconds per page. The Brother MFC 7840W also supports Caller ID, out-of-paper reception, external TAD interface, distinctive ring detection, auto fax reduction, fax forwarding, automatic redial, dual access, and fax broadcasting of up to 258 locations at once. Built-in memory gives Brother MFC 7840W to store up to 600 pages in memory for faxing.

I spent about a week researching for just the right multi-function printer for my needs. I own a small business with about 30 employees so I needed more than an inkjet but didn't require a 'corporate' \$1000+ version either. I needed fax, scan, copy, and print capability with laser printing and built-in wireless capability. Suprisingly, there are not that many printers on the market that can give you all of these in one package.

Originally I was going to purchase the Brother's MFC-8870 for around \$500 which all the reviews on the internet recommend, but I found this while browsing around and realized that it had just come out a few weeks ago. Although there were no reviews out yet for this new printer, it was considerably less expensive than the 8870 and the only thing I seemed to be losing was auto-duplexing so I made the purchase. It took only about 15 minutes total for me to set up an ad-hoc wireless printer setup and everything works great. The scans are nice, the printing is very crisp and clear even in very small fonts. The only thing I haven't tried yet is the fax which I won't be using much. I really can't say anything bad about this product. Sure it would be nice to have a legal-size flatbed, auto-duplex, and 64mb memory (instead of the default 32mb) but for the money this can't be beat. Overall, this product seems to be a really great product at a great price. I highly recommend this printer if you need a 4-in-1 with wireless capability. Definitely the best on the market for this niche.
