Here I Will Be Checking Out The Sony Walkman NWZS545RED 16 GB Video MP3 Player

The first thing you are going to figure out concerning this product is that it's not going to set you back over \$200 like some of the various other MP3 players on the market. [iphone 4 insurance](#) Most of you have heard of Sony and you might recall the original Sony Walkman, well now Sony is producing new Walk-man's with a built in MP3 player. The Sony Walkman NWZS545RED 16 GB Video MP3 Player is actually a good quality MP3 player which will additionally only run you half the cost of what one of the similar 5th generation iPods would wind up costing you.

While the two of these units have 16 GB's of memory and they both will play video you'll find that the screen on the Sony is actually a little bit bigger than that of the iPod. [ipad insurance](#) Whether you pick the iPod or the Sony, you'll discover that either one will be able to store up to 4,000 audio files with regards to the size of the files. You're going to discover that the life of the battery in the iPod is in fact less than the life you will get with the Sony. The battery on the Sony is going to be strong enough to give you about 42 hours of playing audio while the iPod falls short with just 24 hours of usage before you have to recharge the battery. This is additionally because the Sony features a built in Fm radio and it doesn't take as much battery to listen to the radio.

Even though the iPod is actually a good unit you're going to realize that the Sony has something which the iPod does not. And this is the fact that the Sony player in addition is included with built in stereo speakers, which you'll not find in the iPod. Obviously your iPod will sync up perfectly with iTunes and you'll not need to worry about converting the files to the right format. You are able to still order you audio files from iTunes for your Sony player you'll just need to get a converter so that you can convert the AAC files to MP3's

On Amazon you'll find that the iPod has gotten a 4 and 1/4 star rating out of five and the Sony product just received a 4 out of 5 star rating. [consumer priority services](#) Regardless of how you want to look at it more folks have purchased the iPod and this is most likely simply because iPod is really a very well known name in relation to MP3 players.

The price is actually one of the main differences that you are going to find relating to the MP3 players. The iPod Nano 5th generation is considered the most comparable to the Sony and it'll cost you \$275, but the Sony can be purchased for just \$125 and both are available from Amazon. Something you should know is the fact that Nano comes in a 6th generation which does not play video and only comes with a 1.54 inch screen and that device only costs \$169, but it is not comparable to the Sony. When you look at all the features of both products you need to agree that the Sony is actually the better deal, hands down.
