How To Digital DJ Fast - Digital DJ Tips

Want to be in the DJ box, not looking up at it? With digital, you can - if you learn the secrets. This course will teach you all you need to know to get the DJ bookings and success you dream of. Pic: Harper/Smith

Digital DJing – DJing with laptops and controllers – has made achieving the “DJ lifestyle” easier than ever.

Do you want to play in your favourite bars and clubs, instead of just going to them? Get on guest lists across town? Be “the DJ” in your circle of friends? Do you dream of playing your favourite tunes to packed dancefloors of people who’ve come just to hear you?

Of course you do! And as you’ve already guessed, digital DJing can get you all of this, more cheaply and more easily than ever was the case for vinyl and CD DJs.

Trouble is though, with all the different systems out there to choose from, as well as digital music, DJing techniques and technical skills to master, it can be almost impossible for you – the new DJ – to know where to start. What gear is right for you? Where do you find the best music? What skills do you need? How do you plug your gear in when you get to the clubs? Hell, what does a DJ even really do nowadays?

Without proper answers to these questions, you’ll find it’s costly, time-consuming and frustrating to get to the stage where you can play a DJ set in public. It often used to take years for vinyl and CD DJs to master the basics, never mind play real gigs – and while it can be easier to get going with digital, you still need to practise the right things in order to do...
