New Nokia Lumia 800 with Unique Features

The manufacturer new Nokia Lumia series has a new addition, [Nokia Lumia 800](#) was very first released in black colour scheme on deals with all of the United Kingdom networks just a couple of weeks back although buyers ended up primarily aware of two other colour schemes waiting around in line for release date. One particular of these new models has now been released on a choice of Vodafone spend month to month deals & it is new Cyan Blue version of this newest Windows run Nokia Lumia phone, this just leaves the 3rd and ultimate Magenta Pink colour scheme to make a look.

Nokia Lumia 800 offers precisely the same attributes, style and specifications as the black version apart from its new blue colored external housing which is completed in the light blue hue, now obtainable on Vodafone agreement deals buyers can choose up this newest colour scheme for cost-free when using out an supply.

This distinct tariff includes a valuable 250MB of web accessibility every thirty day period which is one thing that will help maintain the Nokia Lumia phones attributes and programs up to date, also incorporated are one hundred minutes of the calls which can be utilized at any time to phone any cellular network and 500 text messages to use each thirty day period.

The Nokia Lumia assortment of phones are the very first to be run by the newest Windows Cellphone 7.5 working software package also identified as the Mango version, this introduces 'Live Tiles' onto house screen of the phone which the user can personalise with continually refreshed providers which includes news studies, weather conditions updates, incoming email messages and social networking standing changes.

This new working system reacts and feels significantly more liquid and contemporary than that of other large-stop devices such as the Android system of Samsung Galaxy S2 & HTC Sensation XE as nicely as new iOS5 of iPhone four and newest iPhone 4S. Each of these rival software package packages use relatively unimaginative icons for their menu navigation & program storage while the new Windows Cellphone 7.5 is a significantly more engaging knowledge with sliding windows & screens.

Nokia Lumia 800 gives a large high quality 8 mega pixel camera with Carl Zeiss optics that can document movie clips in 720p High definition format, the major touch screen measures a pocket friendly three.7 inches and the general style of the phone is extremely similar to that of Nokia N9.

There is at the moment no phrase on when the final Magenta Pink version of Nokia Lumia 800 is because of to strike the industry but we would not be shocked if it is not prior to the festive time period to further boost sales volumes of this new sensible phone for the maker.
