Vtech - Baby's Learning Laptop

Chunky keys, a flashy screen and a jumbo mouse are top-of-the-line features for a pint-sized laptop. Your child controls the action, moving between three modes of educational play: shapes, objects and feelings. Peppy music and surprising sound effects keep the mood bright. After a day of play, snap the top closed and boot down.

Why You'll Love It: This keyboard — unlike your own — is made for baby to bang on.

Age: 6 to 36 months
